

Serve project 101

01

Who can I serve?

Begin by asking yourself or your group the question, who in my very own community can I serve? Make a list of your own ideas or pick an idea from our [LPC resource](#) on LifePoints website under the missions and outreach tab.

Make a connection

Once you have decided who you want to serve, take action and make a connection. Use the internet to help you find a first point of contact. Send the email or make the call. Do both!

02

03

Get the details

Once you've made contact begin to put the pieces of the project together by collecting valuable information. Consider gathering the following info: A set date for the project, time frame, location, amount of volunteers needed, age requirements, skills necessary to complete the project etc.

Download Serve App

Download the app and create your project by following the directions. **ADD YOUR EMAIL. Choose the email you will check as the serve date gets closer.** This will help you stay in communication with people who sign up for your project. Consider adding your project two weeks before serve day.

04

05

Begin to invite

The app allows you to share your project with those closest to you. Share your project with your family, friends, or even your small group. Ask them to sign up through the app.

Share the Fun

Share your project photos with us! Tag LifePoint Church. Tell us the story! Share how you and your group made a difference on serve day.
